

Stain remover

highly effective

250 ml

Properties:

The stain remover is a highly effective cleaning agent for removing tannic acid stains on oak wood surfaces and other woods containing tannic acid.

Discolouration caused by tannic acid can become deeply embedded in the wood despite the wood surface being intact and often cannot be removed by simple maintenance cleaning with soap and water. The stain remover effectively removes these stubborn dark reaction stains.

Thanks to its gel-like consistency, the stain remover is also suitable for vertical surfaces.

Ingredients:

Water, oxalic acid, <5% anionic surfactant from coconut oil, ethanol, thickening agent, silver sulphate.

Application:

First, remove dust and coarse dirt from the surface if necessary. Shake the stain remover well, apply evenly to the stain and leave to work for 30 to 60 minutes to dissolve the stain. Then soak a soft, lint-free cloth in lukewarm water, wring it out well and rub the wooden surface dry with it. Repeat the process if necessary until the wood has regained its original colour.

Important: When removing stains from coloured wood (dyed stains, lyes, oils), it is essential to note that any stain removal (even with just water and a sponge) can damage this colouring, especially if too much pressure is applied or abrasive materials are used. It is therefore advisable to proceed as carefully as possible and always carry out a preliminary test on a suitable area!

After-treatment: To ensure that the surface is permanently protected again, treat the area with a suitable product (oil, wax, etc.) after it has dried completely (preferably the next day).

Cleaning the tools:

Wash with clean water immediately after use.

Storage:

Store in a cool, frost-free place and keep tightly closed.

Disposal:

Wash soaked work materials thoroughly. Dispose of product residues and containers that have not been emptied and cleaned in accordance with local/national legal regulations. Only empty and clean containers should be recycled.

EAK waste code directory: 200129*

Safety instructions:

Keep out of reach of children. If medical advice is needed, have product container or label at hand. Avoid contact with eyes, skin or clothing. In case of contact with eyes or skin, rinse immediately with plenty of water. Protect metals (e.g. fittings) from direct contact.

Safety data sheet available on request.
